EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Non-elected claims 20-37 and 45-49 have been canceled without prejudice.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 13: The prior art fails to teach or fairly suggest a fiducial calibration method for manufacturing a part from a workpiece wherein the separation distance between datums disposed relative to the workpiece are calibrated to workpiece distance units, a machine is then calibrated directly to those workpiece distance units, and the calibrated machine is then used to manufacture the part from the workpiece. This process calibrates the machine directly to the dimensional metric established by the workpiece datums, which is distinguished from the prior art, which conventionally utilizes the datums merely to define a reference coordinate system for the machine.

Regarding claim 38: The prior art fails to teach or fairly suggest a fiducial calibration system for manufacturing a part from a workpiece, including means for calibrating the separation distance between each of the datums to workpiece distance units, and means for calibrating a coordinate system of the machine to the workpiece distance units. As noted above, the system as

Art Unit: 3726

so claimed calibrates the machine directly to the dimensional metric established by the workpiece datums.

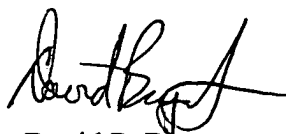

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
